SCOPE OF DECLARATION

Dit MRPI®-EPD certificaat is getoetst door **Harry van Ewijk, SGS**.
 De LCA studie is gedaan door **Pieter Stadhouders, EcoReview**.

Het certificaat is gebaseerd op een LCA-dossier volgens ISO14025 en NEN-EN15804+A1. Het is getoetst aan de hand van het 'EPD-MRPI® verification protocol May 2017.v3.1'. EPD's van bouwproducten zijn niet vergelijkbaar als ze niet voldoen aan NEN-EN15804+A1. Stoffen die voorkomen op de kandidatenlijst van SVHC's van het ECHA worden in dit certificaat gedeclareerd als ze de limiet voor registratie van die stof overschrijden.

DESCRIPTION OF PRODUCT

FGD gypsum is a byproduct from power generation using coal and biomass as fuel that can be used, among other things, for gypsum fibre and gypsum board sheets.

DEMONSTRATION OF VERIFICATION

CEN standard EN15804 serves as the core PCR[a]

Independent verification of the declaration and data,
 according to EN ISO 14025:2010:

internal: external: X

(where appropriate[b]) Third party verifier:

Harry van Ewijk, SGS Search

[a] Product Category Rules [b] Optional for B-to-B communication,
 mandatory for B-to-C communication (see EN ISO 14025:2010, 9.4).

DETAILED PRODUCT DESCRIPTION

Product name: FGD gypsum

Flue Gas Desulphurisation gypsum, or FGD gypsum for short, is a byproduct from power generation using coal and biomass as fuel. It is an excellent replacement for natural gypsum, due to its higher purity and consistent quality.

FGD gypsum is amongst others used in: Gypsum fibre and gypsum board sheets, synthetic anhydrite floors, fireproof building blocks and as a soil enhancer in agriculture.

COMPONENT (> 1%)	[kg / %]
CaSO ₄ + 2H ₂ O	95-100%
moisture	5-12%

(*) > 1% of total mass

SCOPE AND TYPE

This product is produced in the Netherlands. It is applied as an intermediate product for building materials and as soil enhancer.

Ecoinvent V3.4 was used for the analysis.

It is an intermediate product and therefore end-of-life scenarios are not clear. The specific EPD only covers A1-A3.

CALCULATION RULES

Data quality

Data flows have been modeled as realistically as possible. Data quality assessment is based on the principle that the primary data used for processes occurring at the production site is selected in the first instance. Where this is not available, other reference data is selected from appropriate sources.

Data collection period

The dataset is representative for the production processes used in 2018.

Methodology and reproducibility

The process descriptions and quantities in this study are reproducible in accordance to the reference standards that have been used. The references of all sources, both primary and public sources and literature, have been documented.

SCENARIOS AND ADDITIONAL TECHNICAL INFORMATION

A1. Raw materials supply

The input material is free of burden. No emissions from the power generation are allocated onto the FGD gypsum. This approach is in accordance with CEN/TC 51 PCR for cement and building lime, 2015.

A2. Transport of raw materials to manufacturer

All product is picked up directly from the factory. No impact in A2.

A3. Manufacturing

No manufacturing is needed for this intermediate product. No impact in A3.

DECLARATION OF SVHC

None of the substances contained in the product are listed in the "Candidate List of Substances of Very High Concern for authorisation", or they do not exceed the threshold with the European Chemicals Agency.
