**DATE OF ISSUE**

27-10-2021

**EXPIRY DATE**

27-10-2026

**SCOPE OF DECLARATION**

This MRPI®-EPD certificate is verified by **Anne Kees Jeeninga, Advieslab v.o.f..**

The LCA study has been done by **Ruben van Gaalen, EcoReview B.V. .**

The certificate is based on an LCA dossier according to ISO14025 and EN15804+A2 (incl. A1). It is verified according to the 'MRPI®-EPD verification protocol November 2020.v4.0.'. EPDs of construction products may not be comparable if they do not comply with EN15804+A2 (incl. A1). Declaration of SVHC that are listed on the 'Candidate List of Substances of Very High Concern for authorisation' when content exceeds the limits for registration with ECHA.

**PRODUCT**

Basalt Fibre Reinforced Polymer Rebar, 6mm

**DECLARED UNIT/FUNCTIONAL UNIT**

The production of 1 kilogram of product for use as BFRP mesh

**DESCRIPTION OF PRODUCT**

Basalt Fibre Reinforced Polymer (BFRP) mesh serves as a sustainable replacement of reinforcement steel mesh used in concrete constructions.

**VISUAL PRODUCT**

**DEMONSTRATION OF VERIFICATION**

CEN standard EN15804 serves as the core PCR[a]

Independent verification of the declaration and data,

according to EN ISO 14025:2010:

internal:            external: X

Third party verifier:

Anne-Kees Jeeninga, Advieslab v.o.f.

[a] PCR = Product Category Rules

### DETAILED PRODUCT DESCRIPTION

For the production of BFRP Basalt Roving is purchased, this is basalt rock which has been crushed and melted and then put on a bundle of continuous unidirectional complex basalt fibres. These basalt roving are pulled through a bath of resin to impregnate them after which it's heated and dyed to finally undergo polymerization. This process is called pultrusion. After the pultrusion process the BFRP are being sand coated, netted and made with a diameter of 6mm. Then it's shipped to Orlimex in Czech Republic for distribution.

COMPONENT (> 1%)	[kg / %]
Basalt	80%
Resin	9%
Silica Sand	10%

(\*) > 1% of total mass

### SCOPE AND TYPE

The type of this EPD is Cradle-to-Gate (A1-A3). The major steps from the extraction of natural resources to the factory gate are included in the environmental performance of the manufacturing phase, except those that are not relevant to the environmental performance of the product. It is not determined as to how the BFRP are to be processed at the end of life (after 50 years). Therefore, this module is not considered in this LCA study.

The software Simapro is used to perform the LCA. The background databases used are:

- Ecoinvent (v3.6)

**REPRESENTATIVENESS**

This EPD is representative for products produced and sold in the EU. The BFRP is produced in one production site of Galen in Cheboksary, Russia.

**ENVIRONMENTAL IMPACT per functional unit or declared unit (indicators A1)**

	UNIT	A1	A2	A3	A1-A3
ADPE	kg Sb. eq.	1.07E-5	1.20E-5	1.19E-6	2.39E-5

SQP	---	4.80E+0	6.20E+0	2.87E-1	1.13E+1

PM = Potential incidence of disease due to PM emissions  
 IRP = Potential Human exposure efficiency relative to U235 [1]  
 ETP-fw = Potential Comparative Toxic Unit for ecosystems [2]  
 HTP-c = Potential Comparative Toxic Unit for humans [2]  
 HTP-nc = Potential Comparative Toxic Unit for humans, non-cancer [2]  
 SQP = Potential soil quality index [2]  
 ND = Not Declared

Disclaimer [1]

This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Disclaimer [2]

The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator.

## CALCULATION RULES

### Data quality

Data flows have been modeled as realistically as possible. Data quality assessment is based on the principle that the primary data used for processes occurring at the production site is selected in the first instance. Where this is not available, other reference data is selected from appropriate sources.

### Data collection period

The dataset is representative for the production processes used in 2020.

### Methodology and reproducibility

The process descriptions and quantities in this study are reproducible in accordance to the reference standards that have been used. The references of all sources, both primary and public sources and literature, have been documented. In addition, to facilitate the reproducibility of this LCA, a full set of data records has been generated. This data portfolio contains a summary of all the data used in this LCA.

## SCENARIOS AND ADDITIONAL TECHNICAL INFORMATION

### A1. Raw materials supply

This module considers all suppliers including the melting, crushing and processing of basalt roving by supplier to Galen.

### A2. Transport of raw materials to manufacturer

This includes the transport distance of the raw material to the manufacturing facility via road, boat and/or train.

### A3. Manufacturing

This module covers the manufacturing of the BFRP and includes all processes linked to production such as pultrusion, this is the process where basalt roving are pulled through a bath of resin to impregnate them after which it's heated and dyed to finally undergo polymerization.

Use of electricity and natural gas have been taken into account. The transport from Galen production facility to Orlimex in Czech Republic is included in A3. Is produced and certified in accordance with EN ISO/IEC 17067 standard.

### DECLARATION OF SVHC

None of the substances contained in the product are listed in the "Candidate List of Substances of Very High Concern for authorisation", or they do not exceed the threshold with the European Chemicals Agency.
