DATE OF THIS ISSUE

12-6-2025

EXPIRY DATE

12-6-2030

SCOPE OF DECLARATION

This MRPI®-EPD certificate is verified by Ulbert Hofstra, SGS INTRON B.V.. The LCA study has been done by Jochen Reiners, VDZ Technology gGmbH. The certificate is based on an LCA-dossier according to EN15804+A2 (+indicators A1). It is verified according to the 'MRPI®-EPD verification protocol November 2020.v4.0'. EPDs of construction products may not be comparable if they do not comply with EN15804+A2. Declaration of SVHC that are listed on the 'Candidate list of Substances of Very High Concern for authorisation' when content exceeds the limits for registration with ECHA.

PRODUCT

Portland cement CEM I 52,5 N

DECLARED UNIT / FUNCTIONAL UNIT

1 Mass (t)

DESCRIPTION OF PRODUCT

Cement is a hydraulic binder, i.e. a finely ground inorganic material which, when mixed with water, forms a paste which sets and hardens by means of hydration reactions and processes and which, after hardening, retains its strength and stability even under water. The cement declared in this EPD is a portland cement according to EN 197-1, i.e. portland cement clinker ist the only "main constituent".

	Third party verifier: Ulbert Hofstra, SGS INTRON B.V.
	[1] PCR = Product Category Rules

DETAILED PRODUCT DESCRIPTION (PART 1)

The main constituent of CEM I 52,5 N is Portland cement clinker. It is produced from limestone which is crushed and sintered in a rotary kiln at a temperature of 1450°C. Portland cement is produced by intergrinding Portland cement clinker and gypsum from flue gas desulfurisation (setting time regulator). Also, a small amount of fly ash, production dust from the clinker production process and low amounts of additives (chromate reduction agent and grinding aid) are added. Cement is delivered to customers as bulk material or in bags.

Cement is an intermediate product with many different final uses (ready-mix concrete, precast concrete, mortar, cement screed etc.). An RSL can therefore not be indicated.

Component (> 1%)	(kg / %)
Portland cement clinker	90%
Calium sulphate	6%
Minor additional constituents	4%

SCOPE AND TYPE

The cement in this EPD is produced at the Phoenix cement plant in Beckum, Germany. Cement is a hydraulic binder, mainly used for concrete, mortar and cement screed. Since cement is an intermediate product, only the production phase is included in the LCA. The LCA was developed using the "Environmental Performance Assessment Method for Construction Works", version 1.2 (January 2025). Ecoinvent 3.6 for background processes and the "LCA for Experts" Software (version 10.9.0.31). The environmental indicators have been calculated with the characterisation factors "SBK Bepalingsmethode 'set 1', 'set 2' & param (NMD 3.4)".

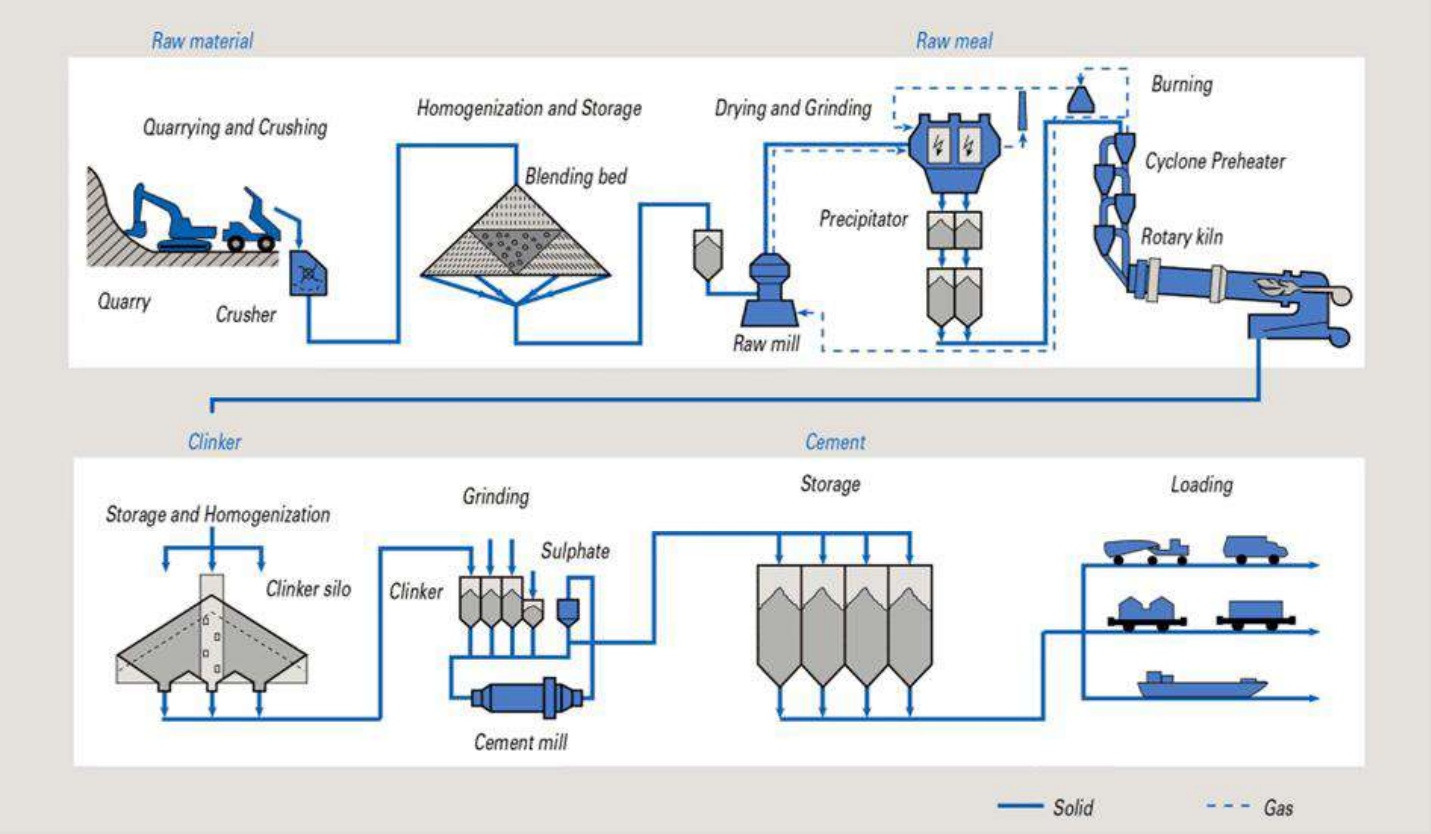
X = Modules Assessed

ND = Not Declared



REPRESENTATIVENESS

The cement is produced in the Phoenix cement plant in Beckum (one production site).

HTP-nc = Potential Comparative Toxic Unit for humans, non-cancer [2]

SQP = Potential soil quality index [2]

Disclaimer [1]:

- This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste.

Disclaimer [2]:

- The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experience with the indicator.

CALCULATION RULES (PART 1)

Virtually no materials or processes have been excluded from the study.
The data was collected for the year 2023.
The NL-PCR cement has been followed. For granulated blast furnace slag and fly ash, economic allocation has been applied.

SCENARIOS AND ADDITIONAL TECHNICAL INFORMATION (PART 1)

Module A1 (Raw material input): For upstream materials and fuels, relevant EcoInvent records were selected. The module comprises all impacts of raw material and fuels supply as well as the generation of electricity used for the cement production.

Module A2 (Transport to the manufacturer): All transports of raw materials and fuels to the plant in Beckum are done by truck.

Module A3 (Manufacturing): This module comprises the environental impacts of the processes in the cement plant, mainly those related to the emissions at the kiln.

DECLARATION OF SVHC

None of the substances contained in the product are listed in the “Candidate List of Substances of Very High Concern for authorisation”, or they do not exceed the threshold with the European Chemicals Agency.
